

Yash Gupta

Jaipur, India | (+91) 7014864776 | yash2804gupta@gmail.com | linkedin.com/in/yash-gu | github.com/yash-gu

Education

Bennett University

Bachelor of Technology in Computer Science and Engineering – CGPA: 9.2/10

Greater Noida, India

Expected Graduation: 2028

Technical Skills

Languages: Java, C++, Python, JavaScript, SQL, Bash

Core Computer Science: Data Structures & Algorithms, Concurrency & Multithreading, OOP, DBMS, OS, Networks

Frameworks & Backend: Spring Boot, FastAPI, Node.js, Express.js, WebSockets, Socket.io, RESTful APIs

Databases & Caching: PostgreSQL, MySQL, Redis, MongoDB, SQLite (aiosqlite)

Cloud & DevOps: AWS (EC2, S3, IAM, VPC), Terraform, Docker, Git, Linux/Unix Shell, GitHub Actions CI/CD

Professional Experience

Probus

Software Development Engineer Intern

Noida, India

Jun 2026 – Present

- Engineered backend microservices for **PROLT**, an enterprise platform processing high-volume bilateral energy bids.
- Developed thread-safe REST APIs in **Java/Spring Boot** for transaction orchestration and state verification.
- Optimized **MySQL** query execution via composite indexing, reducing query latencies and bottlenecks during peak loads.
- Authored comprehensive unit/integration test suites to ensure zero regression in critical financial execution workflows.

Xebia

Software Engineering & Cloud Trainee

Remote

May 2026 – Jun 2026

- Built end-to-end **CI/CD release workflows** using **GitHub Actions**, automating multi-stage linting, testing, and deployment gates.
- Engineered automated data verification and validation pipelines using **Python** and **Java** for enterprise services.
- Containerized application workloads via **Docker**, standardizing runtime environments and eliminating deployment drift.
- Implemented centralized logging and telemetry pipelines to monitor system performance, latency thresholds, and error rates.

Projects

Real-Time Messenger Application | FastAPI, Python, WebSockets, aiosqlite, Docker, React

2026

- Built a real-time messaging engine supporting persistent bidirectional connections via asynchronous **WebSockets**.
- Implemented non-blocking, asynchronous database operations utilizing **aiosqlite** to eliminate event-loop blocking.
- Architected decoupled connection handlers and containerized the service using **Docker** for reproducible deployment.

Campus Desk | React.js, Node.js, Express.js, MongoDB, WebSockets

2026

- Built a real-time seat reservation engine featuring interactive digital floor maps and dynamic zone allocation.
- Engineered bidirectional **WebSocket synchronization** to prevent double-booking anomalies during concurrent reservation spikes.
- Optimized database indexing and concurrent query pipelines to maintain sub-second state latency during peak rush hours.

CampusX | React.js, Node.js, Express.js, MongoDB, Socket.io, AWS (EC2, S3)

2025

- Engineered a distributed campus marketplace featuring low-latency live messaging and AWS S3 media uploads.
- Designed indexed **MongoDB** schemas to optimize high-cardinality searches and read-heavy catalog queries.
- Secured endpoints using **JWT authentication**, granular RBAC, and multi-document transactions.

Certifications

- AWS Certified Solutions Architect – Associate (SAA-C03)** | Amazon Web Services
- AWS Certified Developer – Associate (DVA-C02)** | **AWS Certified Cloud Practitioner (CLF-C02)**

Achievements

- Rank 26 / 591 Teams (Top 4.4%):** Team Lead at **BUSIH 2026 Hackathon**, architecting end-to-end system and API contracts.
- Solved **300+ algorithmic problems** across LeetCode and CodeChef, covering Data Structures, Graphs, Trees, and Dynamic Programming.
- Engineered high-throughput, concurrent backend systems integrating WebSockets, relational databases, and containerized cloud services.
