EDUCATION

Bennett University

Bachelor of Technology in Computer Science and Engineering – CGPA: 9.2/10

Greater Noida, India

2024 – 2028

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript, TypeScript, SQL

Backend & Cloud: Spring Boot, REST APIs, WebSockets, AWS (EC2, S3, RDS, Lambda), Docker

Databases: PostgreSQL, MySQL, MongoDB, Redis

Developer Tools & Core Concepts: Git, GitHub Actions, Linux, Data Structures, OOP, System Design Basics

PROFESSIONAL EXPERIENCE

Probus

Software Development Engineer Intern

Noida, India

Jun 2026 – Aug 2026

- Contributed to **PROLT**, an energy trading platform used to manage bilateral bids and contracts.
- Built modular backend REST APIs in **Java** and **Spring Boot** to process high-volume bids reliably.
- Optimized database queries in **MySQL** using composite indexing to speed up transaction lookups.
- Wrote automated unit and integration tests with **JUnit** and **Mockito** to validate core business logic.

Xebia AI

Software Engineering Intern

Remote

May 2026 – Jun 2026

- Built automated data validation pipelines in **Java** and **Python** to clean incoming AI payloads.
- Integrated automated test suites into **GitHub Actions CI/CD** pipelines to catch bugs prior to deployment.
- Implemented centralized logging to monitor system uptime, endpoint latency, and compute resources.
- Refactored dataset parsers and streamlined execution workflows to improve processing efficiency.

PROJECTS

RemoteNest – Property Management Platform | Java, Spring Boot, PostgreSQL, AWS, Docker Oct 2025 – Dec 2025

- Built a multi-tenant platform with role-based access control for property listings and user management.
- Automated cloud infrastructure deployment on **AWS** using modular **Terraform** templates and CI/CD.
- Designed clean relational schemas in **PostgreSQL** with indexed keys for fast data retrieval.

Campus Desk – Seat Reservation System | React, WebSockets, MongoDB, Redis

Jan 2026 – Mar 2026

- Built a real-time library seat booking platform broadcasting live availability over **WebSockets**.
- Handled concurrent reservation requests using atomic database operations to prevent double-booking.
- Created compound indexes in MongoDB to speed up multi-attribute seat searches during high traffic.

CampusX – Student Marketplace & Chat | React, REST APIs, AWS, Socket.io

Jul 2025 – Sep 2025

- Developed a full-stack campus marketplace featuring real-time peer-to-peer messaging and negotiations.
- Implemented server-side pagination, search filtering, and query caching for fast product browsing.
- Deployed the web service on **AWS EC2** behind an **Nginx** reverse proxy with automated SSL.

ACHIEVEMENTS & CERTIFICATIONS

Problem Solving & CS Fundamentals

2025 – Present

- Solved DSA problems on LeetCode and CodeChef, focusing on Trees, Graphs, and Dynamic Programming.
- Strong foundation in Algorithmic Complexity, Object-Oriented Design, and System Architecture basics.

Certifications

- AWS Associate:** Solutions Architect (SAA-C03), Developer (DVA-C02)
- AWS Foundational:** Cloud Practitioner (CLF-C02)
