Summary

AWS Certified developer and Computer Science undergraduate skilled in full-stack development, cloud infrastructure, and scalable backend systems. Experienced in building production-ready MERN applications using AWS, Terraform, Docker, and real-time WebSocket architectures. Strong problem-solving background with 200+ LeetCode problems solved and hands-on experience deploying secure cloud-native applications.

Technical Skills

Languages: C++, Java, JavaScript, Python, SQL, Bash
Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, Socket.io
Cloud & DevOps: AWS (EC2, S3, IAM, VPC), Terraform, Docker, Jenkins, Git, Linux
Databases: MongoDB, MySQL
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03)
AWS Certified Cloud Practitioner (CLF-C02)

Projects

- RemoteNest – Property Management Platform** 2026
React.js, Node.js, MongoDB, AWS, Terraform
resumeltemBuilt a scalable property management platform with JWT authentication and RBAC.
resumeltemAutomated AWS provisioning using Terraform for EC2, S3, IAM, and VPC infrastructure.
resumeltemDesigned cloud-native architecture for secure document storage and scalable AWS deployment.
– Implemented modular REST APIs and optimized backend services for maintainability and horizontal scalability.
- Campus Desk – Library Seat Booking System** 🐙 GitHub 2026
React.js, Node.js, MongoDB, WebSockets
– Built a real-time library seat reservation system with interactive digital floor mapping for students.
– Implemented WebSocket-based synchronization to prevent double booking during concurrent seat allocation requests.
resumeltemOptimized backend query handling for improved responsiveness during peak usage.
resumeltemDesigned responsive React interfaces for seamless cross-device accessibility.
- CampusX – Real-Time Marketplace** 🔗 Live Demo 2026
React.js, Node.js, MongoDB, AWS, Socket.io
– Developed a peer-to-peer campus marketplace with real-time messaging and dynamic product listing workflows.
resumeltemBuilt scalable REST APIs and deployed backend infrastructure on AWS EC2 with S3 integration.
– Integrated Socket.io-powered real-time communication for instant buyer-seller interactions.
resumeltemImplemented secure authentication and optimized API routing for improved responsiveness.

Side Projects

- Audible Eyes – PDF to Speech** 🐙 GitHub 2026
Python, PyPDF2, Text-to-Speech
– Developed an accessibility-focused application that converts multilingual PDF documents into speech output.
- Calorie Tracker – Desktop Application** 🐙 GitHub 2025
Java, Swing, Multithreading
– Built a desktop-based calorie and fitness tracking application with BMI analytics and reminder scheduling.

Competitive Programming

resumeltemSolved 200+ DSA problems across LeetCode and CodeChef. Earned 1-star rating on CodeChef through consistent participation in competitive programming contests.

Hackathons & Leadership

- Smart Bennett Hackathon – Participant** 2026
Beej Setu – Agriculture Technology Solution
– Collaborated in a 6-member team to build a gamified platform simplifying access to government agricultural schemes.
resumeltemIntegrated an AI chatbot to help farmers understand policy eligibility and documentation.

Education

- Bennett University** 2024 – Present
B.Tech in Computer Science Engineering – CGPA: 9.2/10
- Evolution International School** 2023
Class XII
